

SKIN MARKER WITH RULER

Product

Marking the patient's skin is important in a range of clinical settings and for different reasons but the principal functions can be to:

- ensure surgery is performed on the correct site
- mark an internal anatomical feature identified during diagnostic imaging
- target non- invasive treatments
- plan the surgical approach
- ensure natural realignment of skin flaps during wound closure

MARKER

- Double head marker with regular and fine tip
- Large ink reservoir for longer product life
- Constant ink flow for clear marking
- Clip cap for regular tip and standard cap for fine tip

Gentian violet ink

- Colour works on all ranges of pigmented skin
- Quick drying, indelible, biocompatible
- Non-irritating, non-toxic, hypoallergenic
- Non-smearing, does not run

For quality
&
safety

RULER

Flexible 15 cm

In centimetres and inches

Ensures accurate measurement, even over contoured surfaces

Features

- Single-use, individually packaged in sterile peel pouches
- Latex-free
- Tapered tip for ergonomic handling

SMI tip

For best results, remove oil from the skin using alcohol before marking
