

# PATELLA SET

## Product

This special set is designed for a Patellectomy procedure and combines a of a monofilament steel wire and a reverse cutting needle.

## Info

Patellar fractures make up about 1% of all fractures and are mostly caused by direct trauma to the front of the knee and only a third of these require surgical intervention.

## Benefits

- Reduce the postoperative immobilization period
- Exhibits minimal inflammatory tissue reactivity
- Optimum metal strength and flexibility
